ABOUT KENH

Yes, we KENH: With a strong focus on quality design, KENH plans architectural projects in Austria and Switzerland and manages them in all work stages. The office's fields of expertise include large-scale residential and urban buildings as well as sophisticated realizations in the areas of interior design, historic preservation, loft conversions, hospitality, and retail.

The firm's best-known projects include the reconstruction of Vienna's Praterstern – a major square in the Leopoldstadt district – together with D\|D Landschaftsplanung, the renovation of a historical attic from the Josephine Baroque period in Vienna's city center (Grünangergasse), and the development and implementation of design solutions for studio, office, and commercial spaces such as the Tanzquartier Wien.

KENH was founded in 2005 by Kim Tien, Eric-Emanuel Tschaikner, and Natalie Neubauer-Muzicant. Since 2018, the office operates as KENH Architekten ZT GmbH. KENH consists of nine people and office dog Koko. The company is based in Leopoldstadt, Vienna.
